CTI Effectiveness Analysis
Govern & Assure

Stay Ahead of Threats with Actionable Insights

DEV/NULL

Cyber Threat Intelligence (CTI) is the foundation of proactive defence. A CTI Effectiveness Analysis assesses how well your organization gathers, analyses, and acts on threat intelligence—helping you turn raw data into actionable insights to protect against evolving threats.

More detail

CTI Effectiveness Analysis refers to evaluating how well Cyber Threat Intelligence (CTI) is helping your organisation detect, prevent, and respond to cyber threats. It measures the impact and value of CTI in improving security operations under some key components.

- Accuracy
- Timeliness
- Relevance
- Actionability
- Integration and Usability

Benefits

This service is particularly beneficial for organisations who want:

- To reduce Security Incidents or Breaches
- Better context in Security Alerts.
- To minimise False Positive or False Negative Rates
- To negate growing alert volumes that may be overwhelming teams.
- To Effectively measuring their CTI.
- Clear justification of security investments or any potential future increases in spend.
- To identifying gaps or weaknesses and strengthen their current threat intelligence program.

What's included in the Dev/Null service?

Current State CTI Maturity:

An assessment of your organisation's existing threat intelligence capabilities, measuring how well people, processes, and technologies support effective intelligence operations and decision-making.

Tooling and data source effectiveness:

An analysis of the tools, platforms, and intelligence sources in use to determine their value, integration, and effectiveness in supporting timely and actionable threat intelligence.

Delivering the Review:

Presenting an evaluation of how well your current Cyber Threat Intelligence program is working, identifying strengths, weaknesses, and actionable recommendations for improvement.

Threat coverage and relevance:

An evaluation of how well your current intelligence addresses the threats most relevant to your industry, environment, and risk profile, ensuring focus on what truly matters.

Intelligence lifecycle evaluation:

A review of how intelligence is collected, analysed, disseminated, and acted upon, identifying gaps or inefficiencies across the full intelligence lifecycle.

Why Dev/Null?

Responsive:

We stay flexible and adapt to your priorities, whether that means shifting focus within a project or responding to an emerging threat to provide the best security for you. Our fast-turnaround, communication, and flexible engagement models keep you moving forward without delays.

Evolving:

Continuous learning is at the core of our culture: we routinely assess, refine, and re-engineer our processes, tools, and skills to stay ahead of the threat landscape. This mindset translates into more effective, efficient, and resilient solutions for you.

Sustainable:

We design security architectures and practices that endure, focusing on long-term resilience rather than quick fixes. By embedding best practices, automating controls, and aligning with your business roadmap, we foster a culture of continuous improvement.

Established:

Our team brings deep operational experience developed across a broad range of industries and security domains, backed by proven industry and vendor certifications, and a portfolio of real-world successes. That depth of knowledge lets us solve complex problems with confidence and speed.

Enabling:

Beyond delivering services, we actively coach your staff, sharing best practices, conducting workshops, and providing hands-on training to mature your capability. The result is an empowered internal team that can sustain and expand the gains we deliver.

Actionable:

Complex cybersecurity concepts are distilled into plain language, ensuring every stakeholder, from executives to engineers, understands the risks, options, and recommended actions. This clarity drives informed decisions and smooth collaboration across your organisation.

Choose Dev/Null

Choosing the right partner for your CTI Effectiveness Analysis is crucial. At Dev/Null, we combine cutting-edge methodologies with decades of collective cybersecurity experience to deliver comprehensive assessments tailored to your organization's needs. Our team brings expertise from diverse industries and across all aspects of security operations - from detection and response to cyber threat intelligence and technical operations. We leverage our deep understanding of industry best practices, combined with hands-on operational experience, to provide actionable insights that drive real improvement in your security posture.

Book a conversation with one of our consultants to explore how CTI Effectiveness Analysis can help you.
