External Attack Surface Management Review
Govern & Assure
Find and Fix your Security Exposure

DEV/NULL

Your External Attack Surface Management (EASM) solution is a critical defence against cyber threats. An EASM Effectiveness Review evaluates how well your implementation identifies, prioritises, and mitigates risks across your organisation's externally visible footprint, ensuring you stay ahead of evolving threats.

More detail

Our EASM effectiveness review provides a thorough evaluation of your organisation's external attack surface management capabilities. Our experts will assess all critical components of your security posture, including:

- Examine your security tools (like NMAP, Nessus, and Shodan) to ensure they're configured correctly
- Review how you scan for open ports, misconfigured services, and exposed assets
- Assess your vulnerability scanning processes and prioritisation frameworks
- Check if you have effective logging and monitoring in place
- Evaluate your incident response procedures

We'll provide a comprehensive assessment of what's working well and where there might be gaps.

Benefits

This service is particularly beneficial for organisations who want:

- Certainty regarding optimal tool configuration or deployment
- Confidence in their vulnerability scanning efficiency and prioritisation
- To enhance external asset visibility and tracking capabilities
- A comprehensive review of current security monitoring practices
- Expert evaluation of incident response procedures

Each indicator suggests potential areas where our expertise can provide significant value in strengthening your organisation's EASM posture.

What's included in the Dev/Null service?

Information analysis:

An in-depth assessment of your current EASM service through interview, document, process, procedure and tool review. This phase gathers all relevant data to form a complete picture of your external attack surface management capability.

Current state report:

A comprehensive analysis of the information gathered, presenting findings in an easily digestible format. This report includes maturity and capability assessment of people, process, and technology, and measures how effective the service is at finding unknown external assets and bringing them into management.

Gap analysis report:

A detailed examination identifying the gaps between your current implementation and industry best practices for EASM. This includes recommended improvements for tool configuration, processes, risk prioritisation frameworks, and response procedures.

Improvement roadmap:

A strategic plan outlining practical steps to address identified gaps in your EASM implementation. This roadmap includes prioritised recommendations, resource requirements, implementation timelines, and expected outcomes for each improvement area.

Why Dev/Null?

Responsive:

We stay flexible and adapt to your priorities, whether that means shifting focus within a project or responding to an emerging threat to provide the best security for you. Our fast-turnaround, communication, and flexible engagement models keep you moving forward without delays.

Evolving:

Continuous learning is at the core of our culture: we routinely assess, refine, and re-engineer our processes, tools, and skills to stay ahead of the threat landscape. This mindset translates into more effective, efficient, and resilient solutions for you.

Sustainable:

We design security architectures and practices that endure, focusing on long-term resilience rather than quick fixes. By embedding best practices, automating controls, and aligning with your business roadmap, we foster a culture of continuous improvement.

Established:

Our team brings deep operational experience developed across a broad range of industries and security domains, backed by proven industry and vendor certifications, and a portfolio of real-world successes. That depth of knowledge lets us solve complex problems with confidence and speed.

Enabling:

Beyond delivering services, we actively coach your staff, sharing best practices, conducting workshops, and providing hands-on training to mature your capability. The result is an empowered internal team that can sustain and expand the gains we deliver.

Actionable:

Complex cybersecurity concepts are distilled into plain language, ensuring every stakeholder, from executives to engineers, understands the risks, options, and recommended actions. This clarity drives informed decisions and smooth collaboration across your organisation.

Choose Dev/Null

Choosing the right partner for your EASM Review is crucial. At Dev/Null, we combine cutting-edge methodologies with decades of collective cybersecurity experience to deliver comprehensive assessments tailored to your organization's needs. Our team brings expertise from diverse industries and across all aspects of security operations - from detection and response to cyber threat intelligence and technical operations. We leverage our deep understanding of industry best practices, combined with hands-on operational experience, to provide actionable insights that drive real improvement in your security posture.

Book a conversation with one of our consultants to explore how an EASM Review can protect you.
